Boston, MA 02110

**Re: D.P.U. 15-SQ-05; Boston Gas Company d/b/a National Grid
2014 Annual Service Quality Report**

Dear Secretary Marini:

Enclosed please find the Boston Gas Company d/b/a National Grid ("Boston Gas" or "Company") annual service quality report for calendar year 2014. This report is submitted in accordance with G.L. c. 164, § 1E and the Department of Public Utilities' ("Department") Guidelines established in Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-C (2007) ("Guidelines"). Please also find enclosed my appearance of counsel.

The Company's report contains five sections. Section one is a summary of the Company's 2014 performance. Section two contains available historical performance. Section three contains back-up data and supporting schedules used in calculating the Company's performance. Section four contains the raw data used to support the Company's calculations, including the maximum penalty and/or offset for each penalty measure and the annual transmission and distribution revenues used in the calculations, as required by the Department's Memorandum to Local Gas Distribution Companies dated July 28, 2010. Finally, section five contains the gas leak data for Boston Gas Company, Colonial Gas Company, and Essex Gas Company, as required by G.L. c. 164, § 144(e).

As noted in past reports, effective November 2010, Essex Gas Company ("Essex Gas") was consolidated into Boston Gas, with Boston Gas as the surviving legal entity, as approved by the Department in D.P.U. 09-139. As time progresses, it is increasingly challenging to distinguish Boston Gas and the former Essex Gas's operations, as the companies are now one in the same. Thus, certain metrics in this report, as noted, are provided on a consolidated basis.

It has come to the Company's attention that certain companies file separate data to demonstrate Emergency Response Times pursuant to Section VII(F) of the Guidelines. The Company's response times to incidents reported by emergency officials has been reflected in the Response to Gas Odor Calls historically and for this report. Going forward, the Company has implemented a system to enable it to separately report these incidents.

Mark D. Marini, Secretary
D.P.U. 15-SQ-05
February 27, 2015
Page 2 of 2

In conclusion, the results of the report demonstrate that Boston Gas's service quality performance for 2014 met or exceeded all penalty measure benchmarks calculated in accordance with the Department's Guidelines.¹

Please contact me with any questions. Thank you for your time and attention to this matter.

Very truly yours,

Andrea G. Keefe

Enclosures

cc: George Yiankos, Director of Gas Division (3 copies)
Kevin Brannelly, Director of Rates and Revenues Division (2 copies)
Nancy Stevens, Director of Consumer Division (1 copy)
Jennifer Cargill, Hearing Officer
Jesse Reyes, Office of the Attorney General

¹ Unaccounted For Gas, a reporting requirement, is being calculated and the Company will supplement its filing with the result once it is available.

(1) Years in database = number of years of data collected through 2014.

(2) Mean and Benchmark data calculated consistent the MA D.P.U. Order dated December 11, 2008.

(3) As Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010, there are no longer designated Essex Gas Company employees for the purposes of this metric. Thus, former Essex Gas Company employees are included in the Boston Gas Company's Lost Time Accident (LTA) results. Historically the LTA metric included an allocation of incidents and hours worked from corporate services employees, however, from CY 2013 and going forward only Colonial Gas Company employees will be included in this metric.

2014 Annual Service Quality Report
Boston Gas Company
Section 1 - Form A (Continued)
February 27, 2015

Additional Reporting	Years in Database (1)	Mean and Benchmark	Performance in 2014	Comments
Staffing Levels (2)	19	1,437	N/A	The Company no longer operates under a Performance Based Rate Plan
Restricted Work Day Rate (6)	20		2.96	
Property Damage > \$5K (Number)	22		36	See details in Section 3, Attachment 2.
Unaccounted For Gas (Mcf) (4)	21		N/A	D.P.U. Annual Returns, p. 72 - includes unbilled gas sales.
Capital Expenditures (5)				See details in Section 3, Attachment 3.
# Projects > 10% Total Capital Expenditures	22		0	
Total \$\$ Spent	22		\$ 331,602,557	
Spare Component and Inventory Policy	N/A			See Section 3, Attachment 4.
Customer Surveys (Scale 1-7)	11			
Random (Non-Contact)			6.2	See Section 3, Attachment 5 (b).
Calls (Contact) (3)			6.3	See Section 3, Attachment 5 (a).
Customer Service Guarantees	12			
Number			1,666	
Dollars			\$83,300	

(1) Years in database = number of years of data collected through 2014.

(2) Staffing level benchmark was established based on staffing levels as of 1997. 2014 staffing level data not reported as the Company no longer operates under a Performance Based Rate Plan.

(3) Per Section III.C of the Company's Service Quality Plan, 2014 performance reflects the 12 month arithmetic mean of the two required customer-specific survey questions.

(4) Effective November 1, 2010 Essex Gas Company was consolidated into Boston Gas Company, with Boston Gas Company as the surviving legal entity. As a result for financial reporting purposes, the unaccounted for gas figure for CY 2011 and going forward is for both Boston Gas Company and the former Essex Gas Company. CY2014 Unaccounted For Gas data currently being calculated, and will be provided as soon as available.

(5) Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010, the Capital budget is now reported on a consolidated basis.

(6) As Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010, there are no longer designated Essex Gas Company employees for the purposes of this metric. Thus, former Essex Gas Company employees are included in the Boston Gas Company's Restricted Work Day (RWD) results. Historically the RWD metric included an allocation of incidents and hours worked from corporate services employees, however, from CY2013 and going forward only Colonial Gas Company employees will be included in this metric.

(1) 2002 through 2007 employee count includes all KeySpan MA employees. 2008 through 2011 staffing level data reported consistent with similar data filed in National Grid's merger-related Docket, D.P.U. 07-30. This data reflects total Boston Gas employees and does not include corporate service employees working in MA on behalf of Boston Gas.

(2) Source = D.P.U. Annual Returns, p. 72.

(3) Spending includes overheads and intangibles; Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010, the Capital budget is now reported on a consolidated basis.

(4) Consistent with Section VII.C of the Company's currently effective Service Quality Plan, the Company had no projects in 2013 > 10% of total capital budget.

(5) Consistent with Section III.C of the Company's currently effective Service Quality Plan, the Company reports the arithmetic mean of the responses to these survey questions from CY 2007.

NOTES:	1/ This report is based on a good faith diligent search of the Company's readily available claims and damages records for the period 2005 – 2014. The 2009 through 2014 data includes all damages > \$5,000 versus only "at fault" damages previously reported.			

**NATIONAL GRID
Boston Gas Company
Service Quality Capital Spending Report
Year 2005-2014**

Year	Actual Capital Spending*	Capital Spending Budget
2014	\$331,602,557	\$306,859,186
2013	\$254,957,925	\$262,064,563
2012**	\$257,656,511	\$287,466,160
2011	\$205,646,751	\$223,769,163
2010	\$197,324,991	\$155,095,536
2009	\$177,410,601	\$171,202,855
2008	\$162,384,843	\$151,303,610
2007	\$133,047,062	\$135,822,889
2006	\$114,686,804	\$110,600,060
2005	\$125,759,137	\$106,802,143

* Spending includes overheads and intangibles

** Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010; the capital budget and actual spending are now reported on a consolidated basis.

**NATIONAL GRID NEW ENGLAND
SPARE COMPONENT AND ACQUISITION INVENTORY POLICY AND
PRACTICE
As of December 31, 2014**

The purpose of this report is to document a process for identifying, acquiring, and stocking critical spare items for our distribution system. The process is documented below:

- 1) Develop critical items in inventory
 - a) Solicit feedback from end users for list of top approximate 100 critical items
 - b) Run SAP report for usage history
 - c) Evaluate vendor lead time and shipping considerations
- 2) Combine information above to develop final list of top (approximate) 100 items to be considered critical. This is done for National Grid's two warehouses and is based on the needs and discussions with the divisions requesting material from that particular warehouse:
 - a) S.Yarmouth
 - b) Wilmington/Sutton
- 3) Inventory items are assigned a minimum and maximum quantity in the SAP Inventory Materials Management software application
 - a) When quantity reaches minimum or below, an automated SAP requisition/purchase order will be initiated by an Inventory Analyst to order quantities required to reach maximum set quantities.
- 4) Inventory items are assigned a regular period to be physically counted (cycle count).
 - a) Counts performed and inventory database adjusted as necessary
- 5) Inventory material is issued from the warehouse and SAP Inventory software is updated to reflect actual quantity on hand.
- 6) SAP performance reporting
 - a) Supply Chain will run reports periodically from SAP Inventory to track performance of warehouse using established KPI criteria.

1/ Per Orders DPU 08-15, 08-16 and 08-17, the Company was directed to use the ten year period 1996-2005, when available, to calculate all future benchmarks.

2/ As Boston Gas Company and Essex Gas Company were legally consolidated in November of 2010, there are no longer designated Essex Gas Company employees for the purposes of this metric. Thus, former Essex Gas Company employees will be included in the Boston Gas Company's Lost Time Accident (LTA) results going forward.

SQI Definitions

Odor Calls - Percent of Class I & II Odor Calls responded to within 60 minutes.

Service Appnts. - Percent of Service Calls met on the same day as requested.

On Cycle Meter Reads - Percent of Meters Read on Cycle

Emergency TSF - Percent of Emergency Telephone Calls Handled, (answered or abandoned) within 20 seconds.

Non Emergency TSF - Percent of Non Emergency Telephone Calls Handled, (answered or abandoned) within 20 seconds.

Lost Time Accidents - Lost Time Accident Incidence Rate

DTE Cases /1,000 Res. Custs - DTE Cases per 1,000 Residential Customers

DTE Bill Adj./1,000 Res. Custs. - DTE Bill Adjustments per 1,000 Residential Customers

Section 5

**National Grid Natural Gas Leak Data
Calendar Year 2014**

This section contains the following natural gas leak information for Boston Gas Company, Colonial Gas Company, and Essex Gas Company (together, “National Grid”): (1) the location of each Grade 1, Grade 2, and Grade 3 leak existing as of February 26, 2015; (2) the date each Grade 1, Grade 2, and Grade 3 leak was reported; and (3) the dates of repairs performed on each Grade 1, Grade 2, and Grade 3 leak in 2014.

National Grid manages all leaks on its system in accordance with its internal operations and maintenance procedure LEAK-5010-MA. Attachment 1 lists the existing leaks as of February 26, 2015, their locations, and the reported dates, and current classification. Attachment 2 lists the dates of the leaks repaired and closed in National Grid’s leak management system in 2014.

National Grid has provided the current classification of each leak as of the report date. Any reclassifications will be noted in the next annual report.
